

# Spring Time at The Jewellers Collective

## A Place To Keep Your Ideas Together

**evaluate**  
building experience & confidence:  
feels & looks good, understand,  
experiment again, bring what I know,  
create bigger ideas

**taking action**  
Applying knowledge:  
creating, problem-solving,  
justifying, practicing,  
the a-ha moment

**thinking**  
Thinking to make:  
considering order,  
analyse, estimating,  
connecting

Making; it's all in the doing

Learning jewellery making requires a bit of wonderment, a bunch of ideas, & research into potential ways to make your designs. The best way to start is at the beginning with your visual diary.

Taking action requires a blend of processes to help you. You continually analyse & evaluate your actions for a greater level of understanding. The processes become clearer over time, & opportunities to practice new techniques start to become more attainable.

Some questions that should be on your mind:

What tools will I need?

How do I use & hold them?

Just how do I make my design?

What order do I need follow to make it?

Learning is a continuous cycle of planned outcomes & unplanned consequences. Keep a good visual diary of your thoughts, actions & evaluations so that you have a rich resource to inform & refer to every time you make your own designs.

Not sure how to make your designs, get in touch & lets see how we can get you started.
