Empirical Learning Desires Creativity
Discover Attributes That Are Instinctive

An essential part of our desired creativity is to have an environment that invites inspiration, understanding and immersion. Discovering creativity and the attributes of skills, brings a host of emotions to the maker.

It's important to us that we are here to help dive into to your projects, to assist you in imagining them and to let the work reveal itself. We promote learning by doing! Sometimes the only place to start is at the beginning, before continuing your projects. We are here to support you.

We will help you plan and give time to be consumed by your projects. We will guide you in seeking information and opportunities that build on your ideas.

Wherever your creative storms may take you, Chris & the Team are here to support you. Learn to recognise your creative strengths and weaknesses and build on your own practices, here in the workshop.

"For the things we have to learn before we can do them, we learn by doing them."

Aristotle
